

📌 *GUIDE — DELETE BEFORE SENDING: HOW TO USE THIS TEMPLATE (0-5 yrs, Template B — GenAI-first framing). Positions you as a GenAI QA specialist from the start — the strongest junior framing IF your portfolio is real: 2-3 working GitHub projects you can demo live. At junior level this framing is actually easier to defend than at senior level, because nobody expects you to have years of GenAI history — only working projects and sharp fundamentals. No real portfolio yet? Use Template A and build it first. Amber boxes are guidance — delete all before sending. Replace every [bracketed placeholder]. Target: 1 page.*

YOUR NAME

GenAI QA Engineer — LLM Evaluation & AI Quality | RAGAS • DeepEval • Promptfoo • LangSmith • Python

Hyderabad, India | +91-XXXXXXXXXX | your.email@example.com | linkedin.com/in/yourprofile | github.com/yourhandle

PROFESSIONAL SUMMARY

GenAI QA Engineer focused on LLM and RAG application testing, with [3] years of software testing experience. Evaluates AI responses using Human Evaluation, Automated Evaluation, and LLM-as-a-Judge; validates accuracy, relevance, groundedness, and completeness; and detects hallucinations, bias, and toxicity. Builds Golden and Adversarial datasets, runs prompt-injection and jailbreak suites, and automates evaluation pipelines in Python integrated with CI/CD.

📌 *GUIDE — DELETE BEFORE SENDING: SUMMARY: Mirrors the target JD's vocabulary deliberately. Keep only what your portfolio backs up — at junior level every claim will be tested hands-on.*

GENAI & AI TESTING SKILLS

GenAI / LLM Testing: LLM Response Evaluation, RAG Testing, Hallucination Detection, Prompt Validation, Bias & Toxicity Testing

Evaluation Frameworks: RAGAS, DeepEval, Promptfoo, LangSmith, LLM-as-a-Judge, Human Evaluation Rubrics

AI Security Testing: Prompt Injection, Jailbreak Testing, Adversarial Testing

Datasets & Metrics: Golden / Regression / Edge-Case / Adversarial Datasets; Precision, Recall, Faithfulness, Context Relevance, Safety

Programming: Python, pytest, Prompt Engineering, Git, GitHub Actions

Testing Foundation: Functional & Regression Testing, Test Case Design, JIRA, API Testing, SQL, Agile — [3] years

GENAI TESTING PROJECTS

RAG Chatbot Evaluation Framework (Hands-on Project)

- Built an automated evaluation pipeline for a RAG-based Q&A chatbot using RAGAS and DeepEval, measuring Faithfulness, Answer Relevance, Context Precision, and Context Recall.
- Designed a 150+ question Golden Dataset with ground-truth answers; created Regression, Edge-Case, and Adversarial subsets for release-gating.
- Implemented LLM-as-a-Judge scoring with calibrated rubrics and validated judge reliability against human evaluation on a sample set.
- Detected and documented hallucination patterns (unsupported claims, fabricated citations) and reported groundedness gaps for prompt/RAG tuning.

Prompt Injection & Jailbreak Test Suite (Hands-on Project)

- Created an adversarial test suite in Promptfoo covering prompt injection, role-play jailbreaks, encoding attacks, and system-prompt leakage scenarios.
- Automated safety regression runs in CI/CD so every prompt or model change is gated on safety and quality thresholds.
- Tracked evaluation runs, traces, and failures in LangSmith for debugging and reporting.

LLM Output Quality Dashboard

- Built a Python/[Streamlit] dashboard tracking Faithfulness, Relevance, and Safety pass-rates across prompt versions; used it to select the best of [3] prompt variants.

🔑 *GUIDE — DELETE BEFORE SENDING: PROJECTS: In GenAI-first junior framing, this section IS your experience — put it above work history and link every GitHub repo. Add a one-line 'Live demo:' link if you host anything (Streamlit Cloud is free). Expect interviewers to open the repos.*

WORK EXPERIENCE

QA Engineer / Test Engineer MMM YYYY – Present

Company Name — Client / Domain

- Execute functional, regression, and smoke test cycles for [application]; author test cases from user stories.
- Log, track, and retest defects in JIRA; participate in Agile ceremonies and defect triage.
- Perform API testing (Postman) and basic SQL validation [keep only if true].

🔑 *GUIDE — DELETE BEFORE SENDING: WORK EXPERIENCE: 2-3 bullets — it proves you function in a professional team; the Projects section is your pitch. Freshers: rename to 'Internship' or delete.*

CERTIFICATIONS & LEARNING

- GenAI / LLM Evaluation coursework — e.g., DeepLearning.AI 'Evaluating and Debugging Generative AI', 'Red Teaming LLM Applications' [list what you actually completed]
- Python for Testers / Automation certification [if any]
- ISTQB Foundation [year] • ISTQB Certified Tester – AI Testing (CT-AI) [strongly recommended for this transition]

EDUCATION

B.Tech / B.E. in [Branch], [University], [Year] — [CGPA if ≥ 7.5]
