

🔑 GUIDE — DELETE BEFORE SENDING: HOW TO USE THIS TEMPLATE (5-10 yrs, Template C — ATS-minimal). Maximum-compatibility: single column, standard headings, no color, no tables. Use for Naukri, Workday, Taleo, iCIMS and any untrusted ATS. Content mirrors Template A's hybrid framing — keep both content-synced. Delete all amber boxes; replace every [placeholder]. Upload .docx to Workday/Taleo (parses most reliably); PDF elsewhere.

YOUR NAME

QA Engineer | GenAI & LLM Testing

Hyderabad, India | +91-XXXXXXXXXX | your.email@example.com | linkedin.com/in/yourprofile |
github.com/yourhandle

SUMMARY

QA Engineer with [7]+ years in functional and regression testing, transitioning to Generative AI testing. Skilled in LLM response evaluation (Human Evaluation, Automated Evaluation, LLM-as-a-Judge), RAG testing with RAGAS and DeepEval, hallucination and bias detection, prompt injection and jailbreak testing, and Python-based evaluation automation integrated with CI/CD.

SKILLS

GenAI Testing: LLM Evaluation, RAG Testing, RAGAS, DeepEval, Promptfoo, LangSmith, LLM-as-a-Judge, Hallucination Detection, Bias & Toxicity Testing, Prompt Injection, Jailbreak Testing, Golden/Regression/Edge-Case/Adversarial Datasets, Faithfulness, Context Relevance, Precision, Recall, Responsible AI

QA Foundation: Manual Testing, Functional/Regression/Integration/UAT, Test Planning, Defect Management, JIRA, ALM, API Testing (Postman), SQL, Agile/Scrum

Programming: Python, pytest, Prompt Engineering, CI/CD (Jenkins, GitHub Actions)

🔑 GUIDE — DELETE BEFORE SENDING: SKILLS: Plain comma-separated lines parse in every ATS. Use exact JD keywords — ATS matches strings, not synonyms.

GENAI PROJECTS

RAG Chatbot Evaluation Framework (Hands-on Project)

- Built an automated evaluation pipeline for a RAG-based Q&A chatbot using RAGAS and DeepEval, measuring Faithfulness, Answer Relevance, Context Precision, and Context Recall.
- Designed a 150+ question Golden Dataset with ground-truth answers; created Regression, Edge-Case, and Adversarial subsets for release-gating.
- Implemented LLM-as-a-Judge scoring with calibrated rubrics and validated judge reliability against human evaluation on a sample set.
- Detected and documented hallucination patterns (unsupported claims, fabricated citations) and reported groundedness gaps for prompt/RAG tuning.

Prompt Injection & Jailbreak Test Suite (Hands-on Project)

- Created an adversarial test suite in Promptfoo covering prompt injection, role-play jailbreaks, encoding attacks, and system-prompt leakage scenarios.
- Automated safety regression runs in CI/CD so every prompt or model change is gated on safety and quality thresholds.
- Tracked evaluation runs, traces, and failures in LangSmith for debugging and reporting.

EXPERIENCE

Senior QA Engineer | Company Name — Client / Domain (e.g., Banking, Healthcare) | MMM YYYY – Present

- Own test strategy, planning, and execution for [application]; sign-off across functional, regression, and integration cycles for [N] releases/year.
- Designed and executed [N]+ test cases per release; sustained [N]% defect leakage or lower; mentored [N] junior testers.
- Performed API testing (Postman) and backend validation (SQL); drove defect triage with developers and product owners.
- Evaluated AI-assisted features ([chatbot/search/recommendations]) for accuracy, relevance, and consistency [keep only if true].

QA Engineer | Company Name — Client / Domain | MMM YYYY – MMM YYYY

- Executed functional, regression, and UAT cycles for [application]; authored test cases from BRDs/user stories.
- Logged and tracked defects in JIRA to closure; reduced regression cycle time by [N]% via risk-based prioritization.

CERTIFICATIONS

- GenAI / LLM Evaluation coursework — e.g., DeepLearning.AI 'Evaluating and Debugging Generative AI', 'Red Teaming LLM Applications' [list what you actually completed]
- Python for Testers / Automation certification [if any]
- ISTQB Foundation [year] · ISTQB Certified Tester – AI Testing (CT-AI) [strongly recommended for this transition]

EDUCATION

B.Tech / B.E. in [Branch], [University], [Year]
