YOUR NAME

QA Engineer | GenAI & LLM Testing

Hyderabad, India | +91-XXXXXXXXXX | your.email@example.com | linkedin.com/in/yourprofile |
github.com/yourhandle

SUMMARY

QA Engineer with [3] years of testing experience, specializing in Generative AI testing. Skilled in LLM response evaluation (Human Evaluation, Automated Evaluation, LLM-as-a-Judge), RAG testing with RAGAS and DeepEval, hallucination detection, prompt injection and jailbreak testing, and Python-based evaluation automation.

SKILLS

GenAI Testing: LLM Evaluation, RAG Testing, RAGAS, DeepEval, Promptfoo, LangSmith, LLM-as-a-Judge, Hallucination Detection, Bias & Toxicity Testing, Prompt Injection, Jailbreak Testing, Golden/Adversarial Datasets, Faithfulness, Context Relevance, Precision, Recall

QA Foundation: Manual Testing, Functional/Regression Testing, Test Case Design, JIRA, API Testing (Postman), SQL, Agile

Programming: Python, pytest, Prompt Engineering, Git, GitHub Actions

GENAI PROJECTS

RAG Chatbot Evaluation Framework (Hands-on Project)

- Built an automated evaluation pipeline for a RAG-based Q&A chatbot using RAGAS and DeepEval, measuring Faithfulness, Answer Relevance, Context Precision, and Context Recall.
- Designed a 150+ question Golden Dataset with ground-truth answers; created Regression, Edge-Case, and Adversarial subsets for release-gating.
- Implemented LLM-as-a-Judge scoring with calibrated rubrics and validated judge reliability against human evaluation on a sample set.
- Detected and documented hallucination patterns (unsupported claims, fabricated citations) and reported groundedness gaps for prompt/RAG tuning.

Prompt Injection & Jailbreak Test Suite (Hands-on Project)

- Created an adversarial test suite in Promptfoo covering prompt injection, role-play jailbreaks, encoding attacks, and system-prompt leakage scenarios.
- Automated safety regression runs in CI/CD so every prompt or model change is gated on safety and quality thresholds.
- Tracked evaluation runs, traces, and failures in LangSmith for debugging and reporting.

EXPERIENCE

QA Engineer / Test Engineer | Company Name — Client / Domain | MMM YYYY – Present

- Execute functional, regression, and smoke test cycles for [application]; author test cases from user stories.
- Log, track, and retest defects in JIRA; participate in Agile ceremonies and defect triage.
- Perform API testing (Postman) and basic SQL validation [keep only if true].

CERTIFICATIONS

- GenAI / LLM Evaluation coursework — e.g., DeepLearning.AI 'Evaluating and Debugging Generative AI', 'Red Teaming LLM Applications' [list what you actually completed]
- Python for Testers / Automation certification [if any]
- ISTQB Foundation [year] · ISTQB Certified Tester – AI Testing (CT-AI) [strongly recommended for this transition]

EDUCATION

B.Tech / B.E. in [Branch], [University], [Year] — [CGPA if ≥ 7.5]
