

 **GUIDE — DELETE BEFORE SENDING: HOW TO USE THIS TEMPLATE** (Template C — ATS-minimal). Maximum-compatibility version: single column, standard section names, no color accents, no tables, no graphics. Use for job portals (Naukri, Workday, Taleo, iCIMS) and any company whose ATS you don't trust. Content mirrors Template A's hybrid framing — keep both content-synced.

Amber boxes are guidance — delete all before sending. Replace every [bracketed placeholder]. Save as .docx AND PDF; upload whichever the portal prefers (Workday/Taleo parse .docx most reliably).

YOUR NAME

Senior QA Engineer | GenAI & LLM Testing

Hyderabad, India | +91-XXXXXXXXXX | your.email@example.com | linkedin.com/in/yourprofile |
github.com/yourhandle

SUMMARY

QA professional with [12]+ years in manual and functional testing, transitioning to Generative AI testing. Skilled in LLM response evaluation (Human Evaluation, Automated Evaluation, LLM-as-a-Judge), RAG testing with RAGAS and DeepEval, hallucination and bias detection, prompt injection and jailbreak testing, and Python-based evaluation automation integrated with CI/CD.

SKILLS

GenAI Testing: LLM Evaluation, RAG Testing, RAGAS, DeepEval, Promptfoo, LangSmith, LLM-as-a-Judge, Hallucination Detection, Bias & Toxicity Testing, Prompt Injection, Jailbreak Testing, Golden/Regression/Edge-Case/Adversarial Datasets, Faithfulness, Context Relevance, Precision, Recall, Responsible AI

QA Foundation: Manual Testing, Functional/Regression/Integration/UAT, Test Planning, Defect Management, JIRA, ALM, API Testing (Postman), SQL, Agile/Scrum

Programming: Python, pytest, Prompt Engineering, CI/CD (Jenkins, GitHub Actions)

 **GUIDE — DELETE BEFORE SENDING: SKILLS:** Comma-separated plain lines parse perfectly in every ATS. Keep exact JD keywords; ATS matches strings, not synonyms — 'LLM-as-a-Judge' will not match 'model-based evaluation'.

GENAI PROJECTS

RAG Chatbot Evaluation Framework (Hands-on Project)

- Built an automated evaluation pipeline for a RAG-based Q&A chatbot using RAGAS and DeepEval, measuring Faithfulness, Answer Relevance, Context Precision, and Context Recall.
- Designed a 150+ question Golden Dataset with ground-truth answers; created Regression, Edge-Case, and Adversarial subsets for release-gating.
- Implemented LLM-as-a-Judge scoring with calibrated rubrics and validated judge reliability against human evaluation on a sample set.
- Detected and documented hallucination patterns (unsupported claims, fabricated citations) and reported groundedness gaps to prompt/RAG tuning.

Prompt Injection & Jailbreak Test Suite (Hands-on Project)

- Created an adversarial test suite in Promptfoo covering prompt injection, role-play jailbreaks, encoding attacks, and system-prompt leakage scenarios.
- Automated safety regression runs in CI/CD so every prompt or model change is gated on safety and quality thresholds.
- Tracked evaluation runs, traces, and failures in LangSmith for debugging and reporting.

EXPERIENCE

Senior QA Engineer / Test Lead | Company Name — Client / Domain (e.g., Banking, Healthcare) | MMM YYYY – Present

- Led end-to-end testing for [application], owning test strategy, planning, and sign-off for releases used by [N] users.
- Designed and executed [N]+ test cases per release across functional, regression, and integration cycles; sustained [N]% defect leakage or lower.
- Managed a team of [N] testers; drove defect triage with developers, product owners, and business analysts.
- Applying evaluation-first mindset to AI features: validating chatbot/ML outputs for accuracy, relevance, and consistency [keep only if true].

QA Engineer | Company Name — Client / Domain | MMM YYYY – MMM YYYY

- Executed functional, regression, and UAT cycles for [application]; authored test cases from BRDs/user stories.
- Performed API testing with Postman and backend validation with SQL; logged and tracked defects in JIRA to closure.
- Reduced regression cycle time by [N]% through test-suite optimization and risk-based prioritization.

Earlier roles: [Title], [Company] ([YYYY–YYYY]); [Title], [Company] ([YYYY–YYYY])

CERTIFICATIONS

- GenAI / LLM Evaluation coursework — e.g., DeepLearning.AI 'Evaluating and Debugging Generative AI', 'Red Teaming LLM Applications' [list what you actually completed]
- Python for Testers / Automation certification [if any]
- ISTQB Foundation / Advanced [year] · ISTQB Certified Tester – AI Testing (CT-AI) [strongly recommended for this transition]

EDUCATION

B.Tech / B.E. in [Branch], [University], [Year]
