

# Fashion E-commerce Application

## QA User Stories & End-to-End Test PRD

---

|                                |                                                                                                                   |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------|
| <b>Application Under Test:</b> | https://fashion-ecommerce-we-lunb.bolt.host                                                                       |
| <b>Document Purpose:</b>       | Provide a comprehensive set of user stories to guide in-depth, end-to-end QA testing prior to handoff to testers. |
| <b>Total User Stories:</b>     | 60                                                                                                                |
| <b>Format:</b>                 | Grouped by functional module, each with acceptance criteria and priority                                          |

### 1. Overview

This document is a QA-focused Product Requirements companion for the fashion e-commerce application under test. It converts the expected end-to-end customer journey — from landing on the site through registration, discovery, purchase, and post-order support — into discrete, testable user stories. Each story follows the standard 'As a <role>, I want <capability>, so that <benefit>' format and includes acceptance criteria a tester can directly convert into test cases, plus a priority rating to sequence testing effort.

### 2. How Testers Should Use This Document

- Treat each Acceptance Criterion as at least one positive and one negative/edge-case test case (e.g., valid vs. invalid input, in-stock vs. out-of-stock).
- Test in priority order: Critical → High → Medium → Low, but ensure every story gets at least one pass before sign-off.
- Log defects against the corresponding User Story ID (e.g., US-19) for traceability.
- Re-verify Critical stories (auth, cart, payment, security) across all supported browsers/devices, not just once.
- Where the live site's actual UI/flow differs from an assumption in a story, note the deviation and adjust the acceptance criteria before testing rather than skipping the story.

### 3. Priority Legend

|                 |                                                                                           |
|-----------------|-------------------------------------------------------------------------------------------|
| <b>Critical</b> | Core purchase/security path — a failure here blocks or endangers real transactions.       |
| <b>High</b>     | Major functionality customers rely on regularly; broken = significant UX/business impact. |
| <b>Medium</b>   | Important supporting functionality; broken = degraded but not blocking experience.        |
| <b>Low</b>      | Nice-to-have / polish items; broken = minor inconvenience only.                           |

10. Cross-Cutting: Performance, Security, Compatibility & Accessibility (7 stories)

# 1. Account Registration & Authentication

| ID    | User Story                                                                                                                         | Acceptance Criteria                                                                                                                                                                                                                                                                                                                                                               | Priority |
|-------|------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| US-01 | As a new visitor, I want to register an account with my email and password so that I can save my details for future purchases.     | <ul style="list-style-type: none"><li>_Registration form validates required fields (name, email, password, confirm password)</li><li>_Password enforces minimum strength rules (length, character mix)</li><li>_Duplicate email registration is blocked with a clear error message</li><li>_Successful registration logs the user in or redirects to login/confirmation</li></ul> | High     |
| US-02 | As a returning customer, I want to log in with my registered email and password so that I can access my account and order history. | <ul style="list-style-type: none"><li>_Valid credentials log the user in and redirect to homepage/account</li><li>_Invalid credentials show a generic, non-revealing error message</li><li>_Account locks or throttles after repeated failed attempts</li></ul>                                                                                                                   | Critical |
| US-03 | As a user, I want to log in using a social/third-party account (Google/Facebook) so that I can skip manual registration.           | <ul style="list-style-type: none"><li>_Social login button initiates OAuth flow correctly</li><li>_New social users get an account auto-created with correct email</li><li>_Existing email conflict is handled gracefully</li></ul>                                                                                                                                               | Medium   |
| US-04 | As a user who forgot my password, I want to reset it via email so that I can regain access to my account.                          | <ul style="list-style-type: none"><li>_Reset link is emailed only to registered addresses</li><li>_Reset link expires after a defined time window</li><li>_New password must meet strength requirements before being accepted</li></ul>                                                                                                                                           | High     |
| US-05 | As a logged-in user, I want to log out of my account so that my session ends securely on shared devices.                           | <ul style="list-style-type: none"><li>_Logout clears session/token and redirects to homepage or login</li><li>_Back button after logout does not expose authenticated pages</li></ul>                                                                                                                                                                                             | Medium   |
| US-06 | As a user, I want my session to expire after a period of inactivity so that my account stays secure.                               | <ul style="list-style-type: none"><li>_Session times out per defined policy</li><li>_User is prompted to re-authenticate for sensitive actions (checkout, payment info)</li></ul>                                                                                                                                                                                                 | Medium   |

| ID    | User Story                                                                                                                  | Acceptance Criteria                                                                                                                                                                                                                                       | Priority |
|-------|-----------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| US-07 | As a guest, I want to browse and shop without creating an account (guest checkout) so that I can complete a quick purchase. | <ul style="list-style-type: none"> <li>_Guest can add to cart and complete checkout without registration</li> <li>_Guest is offered an option to create an account post-purchase</li> <li>_Guest order is retrievable via order number + email</li> </ul> | High     |

## 2. Home Page, Navigation & Content

| ID    | User Story                                                                                                                                   | Acceptance Criteria                                                                                                                                                                                                                                                                     | Priority |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| US-08 | As a visitor, I want to see a homepage with banners, featured collections and categories so that I can quickly discover products.            | <ul style="list-style-type: none"> <li>_Homepage loads all key sections (banner, categories, featured/trending products)</li> <li>_Banner carousel navigation (next/prev/auto-rotate) works correctly</li> <li>_All homepage CTAs link to the correct destination pages</li> </ul>      | Medium   |
| US-09 | As a visitor, I want to use the main navigation menu (categories, subcategories) so that I can find product sections easily.                 | <ul style="list-style-type: none"> <li>_All top-level and nested category links route to the correct listing pages</li> <li>_Menu is keyboard-navigable and collapses correctly on mobile</li> <li>_Broken or empty category pages show a friendly empty state, not an error</li> </ul> | Medium   |
| US-10 | As a user, I want to use breadcrumb navigation so that I always know where I am in the site hierarchy.                                       | <ul style="list-style-type: none"> <li>_Breadcrumbs reflect the current category/product path accurately</li> <li>_Each breadcrumb segment is clickable and navigates correctly</li> </ul>                                                                                              | Low      |
| US-11 | As a user, I want the site footer to provide links to policies (shipping, returns, privacy, contact) so that I can find support information. | <ul style="list-style-type: none"> <li>_All footer links resolve to the correct, non-broken pages</li> <li>_Policy content is legible and up to date</li> </ul>                                                                                                                         | Low      |

## 3. Product Discovery: Search, Browse & Filters

| ID    | User Story                                                                                                                                              | Acceptance Criteria                                                                                                                                                                                                                                                                                                                                                    | Priority |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| US-12 | As a shopper, I want to search for products by keyword so that I can quickly find items I'm interested in.                                              | <ul style="list-style-type: none"> <li>_Search returns relevant results for exact and partial matches</li> <li>_Search handles typos/synonyms gracefully (or shows 'did you mean')</li> <li>_Empty/no-result search shows a helpful empty state with suggestions</li> <li>_Special characters and SQL/script injection in the search box are handled safely</li> </ul> | Critical |
| US-13 | As a shopper, I want autocomplete/type-ahead suggestions while searching so that I can find products faster.                                            | <ul style="list-style-type: none"> <li>_Suggestions appear after a minimal number of characters with acceptable latency</li> <li>_Clicking a suggestion navigates to the correct product or listing page</li> </ul>                                                                                                                                                    | Medium   |
| US-14 | As a shopper, I want to filter product listings by size, color, price range, brand and category so that I can narrow results to what I want.            | <ul style="list-style-type: none"> <li>_Each filter correctly narrows the result set (single and combined filters)</li> <li>_Applied filters are visibly listed and individually removable</li> <li>_‘Clear all filters’ resets the listing to the unfiltered state</li> <li>_Filter counts (e.g., items per size) match actual results</li> </ul>                     | High     |
| US-15 | As a shopper, I want to sort product listings (price low-high, high-low, newest, popularity, rating) so that I can view products in my preferred order. | <ul style="list-style-type: none"> <li>_Each sort option reorders results correctly and consistently</li> <li>_Sort selection persists across pagination</li> </ul>                                                                                                                                                                                                    | Medium   |
| US-16 | As a shopper, I want product listings to paginate or infinite-scroll so that I can browse large catalogs without performance issues.                    | <ul style="list-style-type: none"> <li>_Pagination controls or infinite scroll load the correct next set of products</li> <li>_No duplicate or skipped products occur between pages</li> <li>_Page load time remains acceptable as the user scrolls/paginates</li> </ul>                                                                                               | Medium   |
| US-17 | As a shopper, I want to view products as a grid or list so that I can browse in my preferred layout.                                                    | <ul style="list-style-type: none"> <li>_Grid/list toggle changes layout without losing filters/sort/scroll position</li> </ul>                                                                                                                                                                                                                                         | Low      |

## 4. Product Detail Page (PDP)

| ID    | User Story                                                                                                                                                   | Acceptance Criteria                                                                                                                                                                                                                                               | Priority |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| US-18 | As a shopper, I want to view detailed product information (images, description, fabric, price, size chart) so that I can make an informed purchase decision. | <ul style="list-style-type: none"> <li>_All product data fields render correctly and match backend data</li> <li>_Multiple product images/zoom/gallery function correctly</li> <li>_Size chart/guide is accessible and accurate</li> </ul>                        | High     |
| US-19 | As a shopper, I want to select size and color variants on the PDP so that I can choose the exact item I want.                                                | <ul style="list-style-type: none"> <li>_Selecting a variant updates price, image, and availability correctly</li> <li>_Out-of-stock size/color combinations are clearly disabled or labeled</li> <li>_Selected variant carries correctly into the cart</li> </ul> | Critical |
| US-20 | As a shopper, I want to see real-time stock availability so that I don't attempt to buy an item that's out of stock.                                         | <ul style="list-style-type: none"> <li>_ 'Out of stock' / 'low stock' indicators reflect actual inventory</li> <li>_Add-to-cart is disabled or blocked for unavailable items</li> </ul>                                                                           | High     |
| US-21 | As a shopper, I want to view customer ratings and reviews on the PDP so that I can evaluate product quality before buying.                                   | <ul style="list-style-type: none"> <li>_Average rating and review count display accurately</li> <li>_Reviews list, sort, and pagination function correctly</li> <li>_Review submission requires a verified purchase or account, per policy</li> </ul>             | Medium   |
| US-22 | As a shopper, I want to see related/recommended products on the PDP so that I can discover complementary items.                                              | <ul style="list-style-type: none"> <li>_Recommended products are relevant and link to correct PDPs</li> <li>_Recommendation module doesn't break layout when empty</li> </ul>                                                                                     | Low      |
| US-23 | As a shopper, I want to zoom into or view a 360°/multiple-angle image of a product so that I can inspect details before purchasing.                          | <ul style="list-style-type: none"> <li>_Zoom works on desktop (hover/click) and mobile (pinch/tap)</li> <li>_All product angle images load without distortion or broken links</li> </ul>                                                                          | Low      |
| US-24 | As a shopper, I want to add a product directly to my wishlist from the PDP or listing page so that I can save it for later.                                  | <ul style="list-style-type: none"> <li>_Wishlist icon toggles correctly (added/removed) with visual feedback</li> <li>_Wishlist action requires login or persists for guest session, per design</li> </ul>                                                        | Medium   |

## 5. Shopping Cart

| US-50 | As a customer, I want to receive email/SMS notifications for order status changes (confirmed, shipped, delivered) so that I stay informed.             | _Notifications trigger at the correct order lifecycle stage<br>_Notification content matches actual order data                                              | Medium   |
| US-51 | As a shopper, I want to subscribe/unsubscribe to the marketing newsletter so that I control what communications I receive.                             | _Subscribe form validates email format and confirms subscription<br>_Unsubscribe link works and stops future emails                                         | Low      |
| US-52 | As a shopper, I want to see accurate sale/discount pricing (strikethrough original price, % off) on promotional items so that I understand my savings. | _Discounted price, original price, and % off are mathematically consistent<br>_Promotional badges (e.g., 'Sale', 'New') display only on qualifying products | Medium   |
| US-53 | As a shopper, I want to be notified when an out-of-stock item I want becomes available so that I don't miss restocks.                                  | _'Notify me' signup captures email correctly against the specific variant<br>_Notification is sent when the item is actually restocked                      | Low      |

## 10. Cross-Cutting: Performance, Security, Compatibility & Accessibility

| ID    | User Story                                                                                                                                                          | Acceptance Criteria                                                                                                                                                           | Priority |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| US-54 | As a shopper on a mobile device, I want the entire site to be fully responsive so that I can shop comfortably on any screen size.                                   | _All key pages (home, PDP, cart, checkout) render correctly on common mobile, tablet, and desktop breakpoints<br>_Touch targets, menus, and forms are usable on small screens | High     |
| US-55 | As a shopper, I want pages to load quickly so that I don't abandon the site due to slowness.                                                                        | _Homepage, listing, and PDP load within acceptable performance thresholds<br>_Image assets are optimized and do not block page rendering                                      | Medium   |
| US-56 | As a shopper, I want the site to work consistently across major browsers (Chrome, Safari, Firefox, Edge) so that my experience doesn't depend on my browser choice. | _Core flows (browse, cart, checkout) are verified on each supported browser and its latest-1 version<br>_No layout-breaking or functional inconsistencies across browsers     | Medium   |

| ID    | User Story                                                                                                                                                       | Acceptance Criteria                                                                                                                                                                                                                                                                                                  | Priority |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| US-57 | As a shopper using a screen reader or keyboard only, I want the site to be accessible so that I can shop independently.                                          | <ul style="list-style-type: none"> <li>_All interactive elements are reachable and operable via keyboard alone</li> <li>_Images have meaningful alt text; forms have associated labels</li> <li>_Color contrast meets WCAG AA thresholds</li> </ul>                                                                  | Medium   |
| US-58 | As a security-conscious user, I want the application to protect against common vulnerabilities (XSS, SQL injection, CSRF) so that my data and account stay safe. | <ul style="list-style-type: none"> <li>_Input fields (search, forms, reviews) reject/sanitize script and injection payloads</li> <li>_Sensitive actions require CSRF protection/re-authentication as applicable</li> <li>_No sensitive data (tokens, passwords) is exposed in client-side storage or URLs</li> </ul> | Critical |
| US-59 | As a shopper, I want the application to handle network interruptions or timeouts gracefully so that I don't lose my cart or get stuck without feedback.          | <ul style="list-style-type: none"> <li>_Loss of connectivity during checkout shows a clear error rather than a blank/broken state</li> <li>_Cart/session state is preserved or recoverable after reconnecting</li> </ul>                                                                                             | Medium   |
| US-60 | As a shopper, I want error pages (404, 500) to be user-friendly so that I can recover and continue browsing even when something goes wrong.                      | <ul style="list-style-type: none"> <li>_Invalid/broken URLs show a branded 404 page with navigation back to the site</li> <li>_Server errors are caught and shown as a friendly message, not a raw stack trace</li> </ul>                                                                                            | Low      |

## 4. Suggested Test Coverage Checklist (Non-Functional)

- Regression pass across full purchase funnel after every deploy (register/login → search → PDP → cart → checkout → payment → confirmation).
- Data validation: verify tax/shipping/discount math against a manually calculated expected total for at least 5 varied cart combinations.
- Negative testing: invalid coupon codes, expired sessions, out-of-stock race conditions (two users buying the last unit simultaneously).
- Cross-device: at least one full purchase completed on a real or emulated mobile device, not just a resized desktop browser.
- Localization/currency formatting, if the store supports multiple regions.
- Load/performance spot-check on PDP and checkout under concurrent simulated users, if load testing tools are available.

Note: This PRD was authored from standard fashion e-commerce functionality and industry best practice, since the target site is a client-rendered application whose specific screens could not be enumerated automatically. Before testing begins, walk the live site once against this document and adjust any story whose flow, field names, or business rules differ from what is assumed here.
